- **Cleans, Polishes & Protects**
- **Two-Stage Solvent Formula Shakes Easily Back Into Suspension**
- **Ultra-Fine Abrasive System Won't Scratch**
- **Designed for Harder Metals Like Chrome, Stainless Steel, Magnesium & Nickel**

- **Removes Corrosion, Stains, Oxidation, Tarnish, Rust & Water Spots**
- **Easy On- Easy Off Liquid**
- **Carnauba Wax for Ultimate Protection**
- **Protects Wheels From Water Spots**
- **VOC Compliant**

C-90-P All Metal Polish

FEATURES AND BENEFITS

C-90-P All Metal Polish cleans, polishes and protects harder metals like chrome, stainless steel, magnesium and nickel surfaces. C-90-P contains ultra fine abrasives combined with 2 high grade silicones and wax in a solvent formula. Works great on billet and cast aluminum, brass, copper, gold, silver, bronze and other non-clear coated metals. This solvent based liquid formulation goes on easily and wipes off effortlessly. It quickly removes corrosion, oxidation, stains, rust, tarnish, water spots, tar, grease, bugs and dirt, while restoring the metal's original brilliance. Carnauba wax and natural oils seal in deep shine and offers long term protection. It contains no acid or ammonia. Utilizes a fine abrasive system for better polishing qualities. The two-stage solvent formula contains no thickeners or suspension agents, so shaking polishing agents back into suspension is required.

RECOMMENDED FOR

Use on auto and truck trim, stainless tankers, billet aluminum accessories, Harley trim, running boards, diamond plate, ALCOA, Centerline and other custom wheels, marine hardware, engine accessories, metal cookware, jewelry, fire engines and more.

Note: Not recommended for certain aftermarket wheel finishes such as non-coated, polished, anodized or polished billet aluminum. **Always consult wheel manufacturer for care of delicate, aftermarket wheels** before using this product as staining may occur.

APPLICATION

Directions: Shake well before using. Rubber gloves are recommended while using this product. Apply a small amount to a soft, cotton terry cloth towel. Spread over the surface and rub back and forth with the grain of the metal, until a black

residue appears on the towel. Allow to dry for 20 seconds. Wipe off with a clean soft, 100% cotton terry cloth towel. Burnish to a high gloss, Reapply as needed.

Machine use: Spread product evenly over the surface and buff with adequate pressure. As the product dries, reduce pressure and burnish to a high gloss

SPECIAL NOTES

Safety glasses and NIOSH approved dust mask are recommended while machine buffing this product. If excessive rust, water spots or corrosion is present, use C-50-Q Aluminum & Mag Polish to pre-clean surface.
